

ROHIT MISTRY

PYTHON DEVELOPER | SOFTWARE DEVELOPER

Kolkata, West Bengal, India | +91 91236 47847 | mr.mistryrohit@gmail.com
linkedin.com/in/mr-rohit-mistry | github.com/Absurd-Pilgrim

PROFESSIONAL SUMMARY

Python-focused Software Developer with nearly 2 years of professional experience delivering software, web, and Android/mobile solutions across the development lifecycle. Hands-on with Python, JavaScript/TypeScript, React, React Native, REST APIs, SQL/SQLite, Firebase, and data analytics. Strong in understanding business requirements, translating workflows into practical technical solutions, communicating with technical and non-technical stakeholders, documenting work, and training end users. Project experience includes offline-first business applications, academic publishing platforms, mobile commerce flows, and Python-based machine learning prototypes.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, C, C++, SQL, R

Python & Data: Pandas, NumPy, scikit-learn, data analysis, machine learning fundamentals, Google Colab

Web & Mobile: React, React Native, Expo, Vite, HTML5, CSS3, Tailwind CSS, Bootstrap, jQuery

Databases & Platforms: MySQL, SQLite, MongoDB, Firebase

APIs & Engineering: REST API integration, Git, GitHub, SDLC, debugging, testing, requirements analysis, technical documentation

Analytics & Reporting: Power BI, Tableau, Microsoft Excel, Microsoft Word, Microsoft PowerPoint

Development Tools: GitHub Copilot, Claude Code

Professional Strengths: Business requirement understanding, stakeholder communication, problem solving, training and mentoring, project coordination

PROFESSIONAL EXPERIENCE

Technical Developer | Trimplin Pvt. Ltd. | Kolkata, India | Oct 2024 - Present

- Develop software, web, and Android/mobile solutions using Python, JavaScript/TypeScript, React, React Native, and related technologies, translating business needs and functional requirements into technical implementations.
- Build and maintain application modules, user interfaces, data flows, and integrations with focus on debugging, testing, usability, maintainability, and clear documentation.
- Use Git/GitHub and AI-assisted development tools such as GitHub Copilot and Claude Code to accelerate implementation while reviewing and validating generated code.
- Create data analyses, dashboards, and visualizations using Power BI, Tableau, R, and Excel to support reporting and decision-making.
- Author technical and academic reports, documentation, and presentations for varied audiences, adapting complex information into clear, structured communication.
- Provide technical training, guidance, and mentoring to students and professionals from undergraduate through PhD level on programming, data analysis, and technical writing.
- Manage multiple concurrent software, web, analytics, and documentation workstreams while meeting project deadlines.

SELECTED PROJECTS

Crop Yield / Agriculture Production Optimization - ML Project | *Python, Pandas, NumPy, scikit-learn, Google Colab*

- Built a Python-based machine learning prototype for agriculture production optimization, preparing and analyzing data with Pandas and NumPy.
- Experimented with predictive classification approaches including logistic regression and KNN using scikit-learn to explore data-driven decision support.

CreditBook - Offline-First Business Ledger App | *React Native, TypeScript, Expo, SQLite, Firebase*

github.com/Absurd-Pilgrim/creditbook-trimplin

- Developed an Android-focused business ledger application supporting customer and supplier records, ledger transactions, billing, stock/inventory, authentication, and reporting.
- Implemented a local SQLite repository layer and a dedicated SyncService with Firebase connectivity to support offline-first workflows and later synchronization.
- Structured the application with reusable screens, contexts, repositories, and components to separate business logic, persistence, and user interface concerns.

IJFINK - Academic Journal Platform (Contributor) | *React, TypeScript, Vite, Tailwind CSS, shadcn/ui, REST APIs*

github.com/Absurd-Pilgrim/IJFINK | ijfink.vercel.app

- Contributed to a responsive academic journal web platform covering journal information, research content, editorial board, paper submission, and contact workflows.
- Worked within a component-based React architecture using Vite, Tailwind CSS, shadcn/ui/Radix components, routing, validation, testing tooling, and documented REST API integration requirements.
- Supported an API-ready frontend aligned with documented JWT authentication and role-based journal workflows while keeping the user experience consistent across sections.

Mustafa Coffee House - Mobile Ordering App | *React Native, TypeScript, Expo*

github.com/Absurd-Pilgrim/Mustafa-Coffee-House-MobileApp

- Built a mobile commerce interface with onboarding, sign-in/sign-up, menu and product browsing, cart, checkout, locations, rewards, and account screens.
- Used Expo Router/React Navigation and reusable TypeScript components to organize navigation and customer-facing ordering flows across the application.

Med-A-Point - Doctor Appointment Booking Frontend | *Web Frontend* | *IBM SkillsBuild Internship Project*

- Developed the frontend of a doctor appointment booking website as part of an IBM SkillsBuild internship project, focusing on a clear user-facing booking experience.

Personal Portfolio Website | *HTML5, CSS3, Bootstrap, jQuery*

github.com/Absurd-Pilgrim/portfolio

- Designed and built a responsive portfolio website with animated content, carousel components, theme switching, resume/contact sections, and Formspre- based contact submission.

EDUCATION

B.Tech, Electronics and Communication Engineering | Swami Vivekananda Institute of Science and Technology, West Bengal | Oct 2020 - Jun 2024

CGPA: 8.89/10

Higher Secondary (Class XII) | Naktala High School, Kolkata, West Bengal | 2020 | Score: 85%

Secondary (Class X) | Naktala High School, Kolkata, West Bengal | 2018 | Score: 84%

LANGUAGES

Bengali | English | Hindi
